INTRODUCING THE CLUB CAR 411

Compact, Electric, Versatile

The Club Car 411 utility vehicle is the compact all-electric vehicle designed with your campus in mind. Ideal for low-speed logistics and cargo services, it fills the gap between full-sized trucks and small utility carts, soon to be the MVP of your campus fleet.

COMFORTS THAT GET THE JOB DONE

The 411 LSV replaces a full-sized truck, but it doesn't leave the comforts behind. Unlike many utility vehicles, the 411 sports lockable doors, a back-up camera, radio, and the real music to your crew's ears, ventilation and heat.

Choose from a van box, pickup or flatbed design to customize your utility vehicle to your work.

POWER TO PERFORM, ECONOMICALLY

The 411 LSV's powerful all-electric motor has the range to handle a full day's work and recharge overnight.

Equipped with a 13.4 HP motor, and up to 1,246 lbs (565 kg) payload capacity the Club Car 411 has the power to tackle any job so you can do your best work.

CLUB CAR 411 - DESIGNED FOR YOUR WORK DAY

In addition to its cargo capacity, the 411 has numerous other features designed to get the job done efficiently and comfortably.

- Power-assist steering
- 4-wheel hydraulic disc brakes
- Standard backup camera
- Cabin heat and ventilation
- LCM display - Speedometer, battery health, FM radio
- Optional GPS locator with alerts, and geofencing

In addition, the 411 LSV meets low-speed vehicle compliant safety standards for the U.S. and Canada, comes with a Vehicle Identification Number (VIN) and once registered, can be driven on roads posted 35 mph or less.

Learn more about Club Car 411 by visiting clubcar.com or by reaching out to your local Club Car representative.
