# Feel safe and secure.

Greater security means giving your employees and visitors the confidence they need to come back to work and feel good about their environment. They need to know you're taking every measure to ensure your buildings are safer, healthier places. A happy, productive, high-quality workforce starts with feeling comfortable and secure.

## Proactive Protection

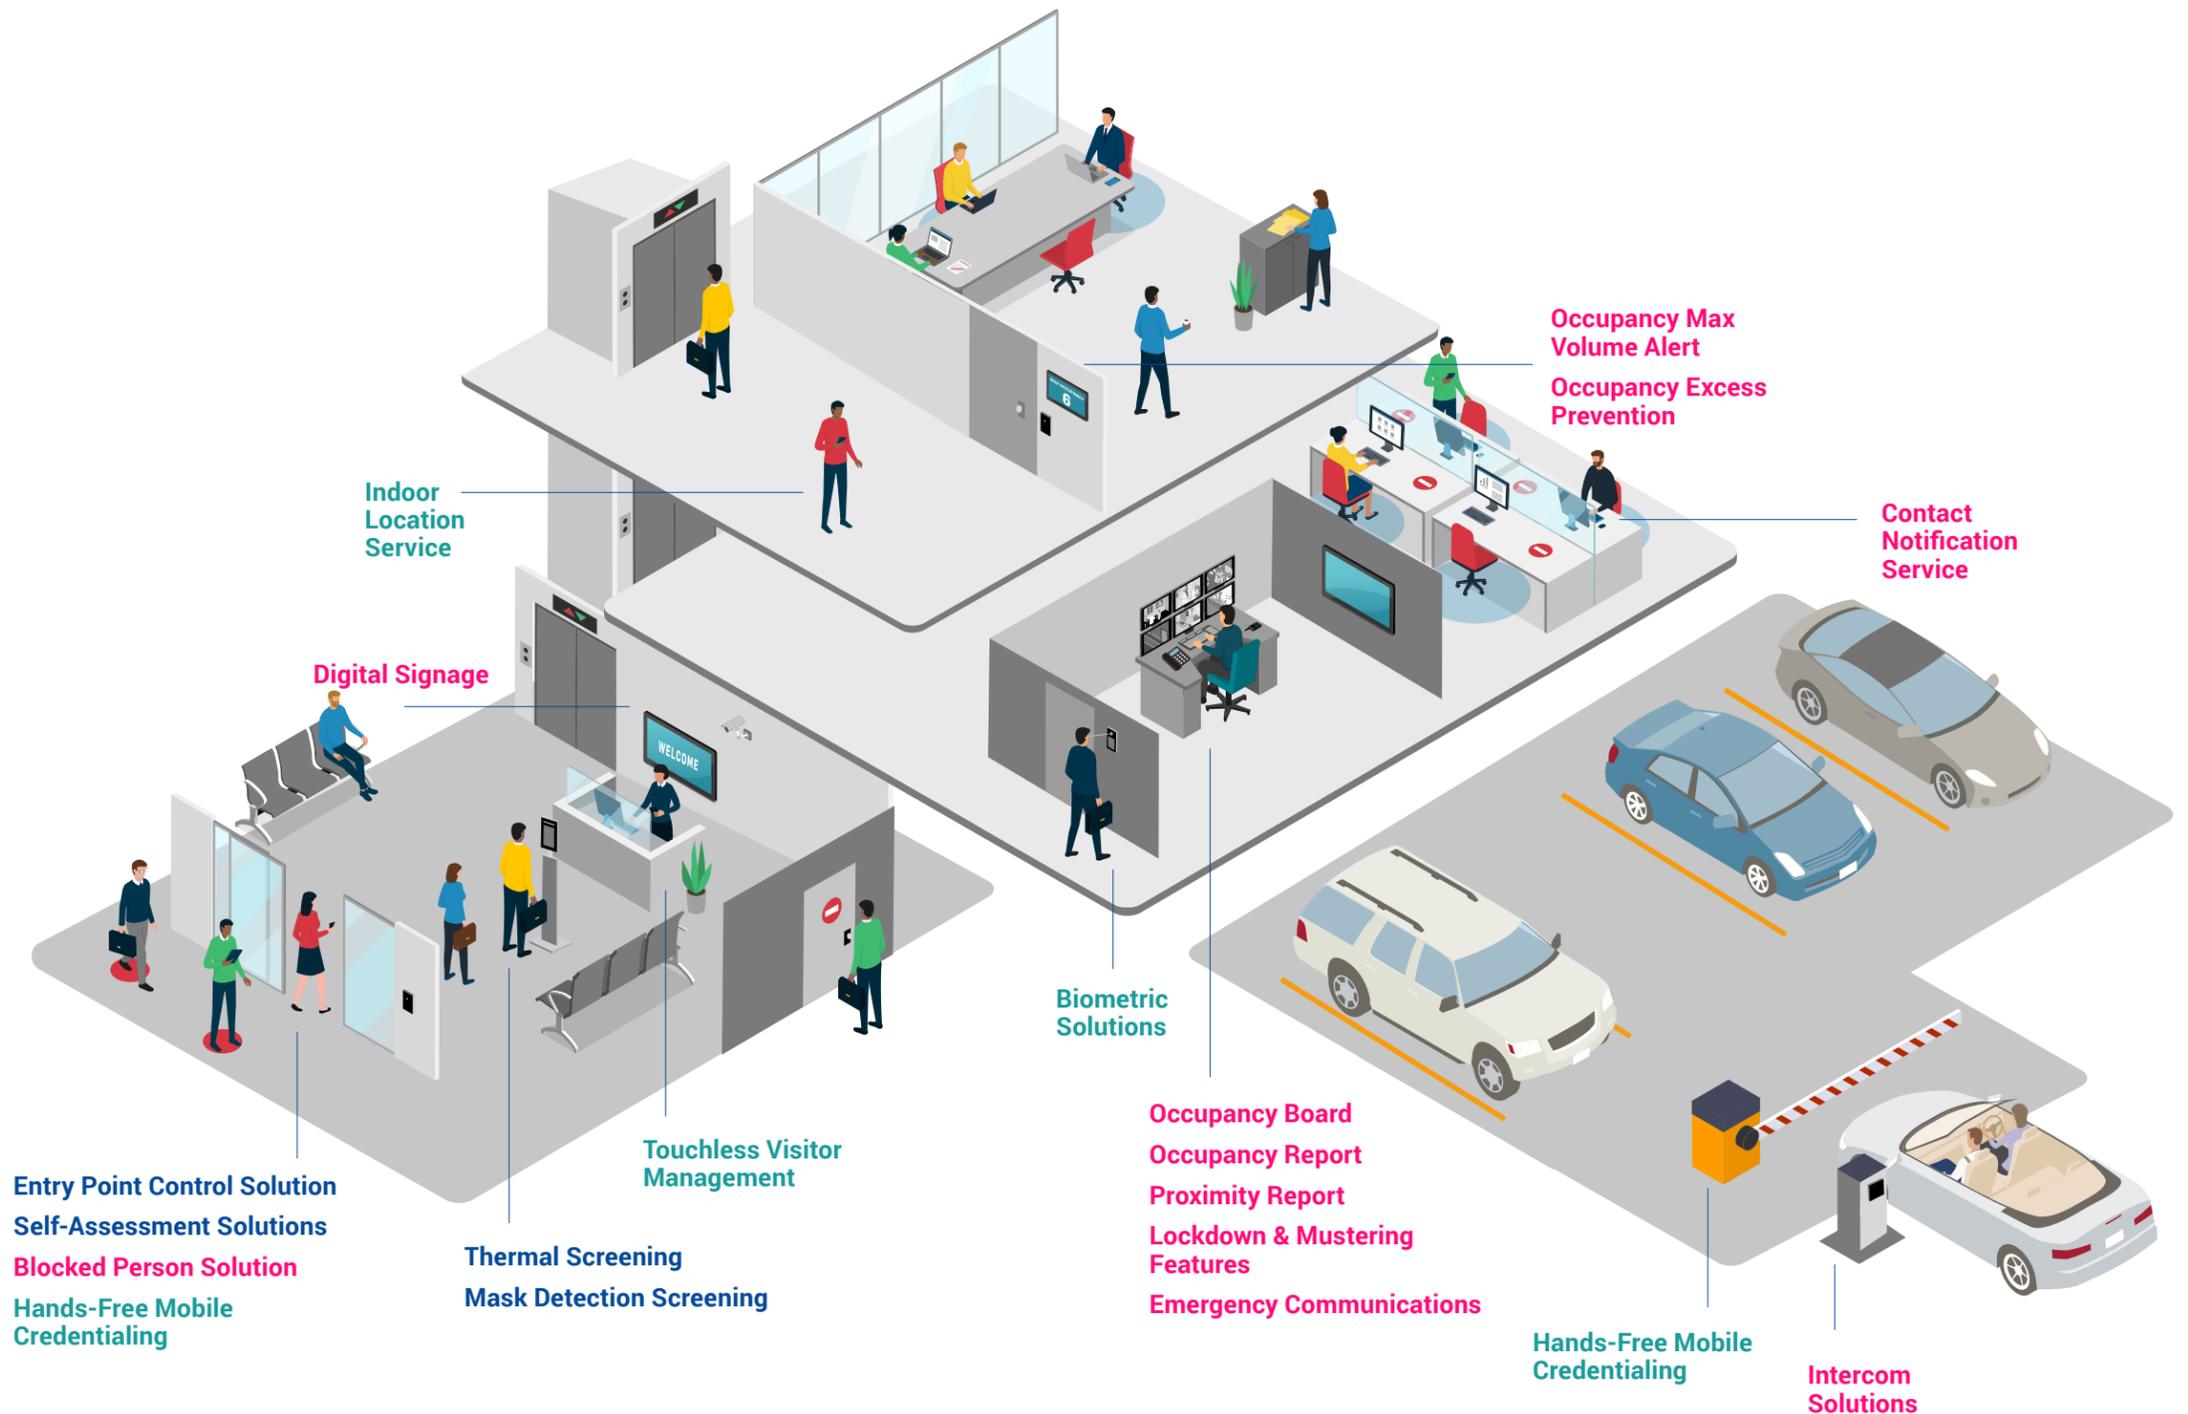

- Self-Assessment Solutions
- Entry Point Control Solution
- Thermal Screening
- Mask Detection Screening

## Fewer Touch Points

- Hands-Free Mobile Credentialing
- Facial Recognition
- Iris Recognition
- Touchless Fingerprint
- Touchless Visitor Management
- Indoor Location Service
- Mobile Multi-factor Authentication

## Safe Occupancy Levels

- Occupancy Max Volume Alert
- Occupancy Excess Prevention
- Occupancy Board
- Occupancy Report
- Blocked Person Solution
- Contact Notification Service
- Proximity Report
- Lockdown & Mustering Features
- Digital Signage
- Intercom/Emergency Communications

## Proactive protection

Secure entrances are your first signal to employees and visitors that you take their health and safety seriously. Proactive screening tools allow them to self-assess their own health and wellness before accessing a building. Integrated screening tools deliver an additional layer of protection while providing a detailed record of everyone who has entered your building.

## All our screening tools allow you to leverage your existing OnGuard® or NetBox™ access control system for enhanced entrance control.

### Self-Assessment Solutions

Simple, customizable questionnaires allow you to grant or deny access to employees (cardholders) and visitors based on their responses.

#### OFFERINGS:

*OnGuard/NetBox Cardholder Self Assessment*  
*OnGuard Visitor Self Assessment*

### Entrance Control

Our Entry Point Control Solution enables you to designate specific entrances to funnel users for daily health screening. Upon successful screening, users can access any door until the next day.

#### OFFERINGS:

*OnGuard/NetBox Entry Point Control Solution*

### Thermal Screening

These integrated offerings allow you to override access rights based on elevated skin temperatures for stricter control of individual cardholder's access.

#### OFFERINGS:

*Invizium IXM TITAN™ Multi-Biometric Reader*

### Mask Detection Screening

Intelligent dual-camera biometric and screening solutions enable you to grant or deny access based on camera recognition of facial masks.

#### OFFERINGS:

*Invizium IXM TITAN Multi-Biometric Reader*

## Our industry-leading touchless solutions are designed to work seamlessly with existing infrastructure, giving you a cost-effective way to upgrade your facility's safety and security.

### Hands-Free Mobile Credentialing

Our next-generation access-control offering significantly reduces access touch points by enabling employees to use their phones as badges, providing greater safety and security.

**OFFERINGS:**

*BlueDiamond™ Mobile Credentials*

### Touchless Visitor Management

Reduce touch points by allowing visitors and employees to securely sign in from their smartphones through an app.

**OFFERINGS:**

*Splan Visitor Management*

### Facial Recognition

These innovative technologies help reduce touch points through intelligent facial recognition.

**OFFERINGS:**

*Invixium IXM TITAN Multi-Biometric Reader*

*Idemia VisionPass Biometric Reader*

*BioConnect Suprema FaceStation Biometric Reader*

### Indoor Location Service

Our new app lets users quickly determine their current location within a building, search for points of interest and use turn-by-turn directions for efficient navigation.

**OFFERINGS:**

*BlueDiamond Indoor Location Service*

### Iris Recognition

Non-contact, iris-recognition-based biometric technology is accurate, fast and secure, and can be combined with cards for multi-factor authentication.

**OFFERINGS:**

*Iris ID IrisAccess® Biometric Identification Reader*

### Mobile Multi-factor Authentication

Mobile multi-factor authentication provides an additional layer of security to physical access points.

**OFFERINGS:**

*BioConnect Multi-factor Authentication Solution*

### Touchless Fingerprint

Just one pass of the hand over the sensor acquires four fingers in 3D for maximum accuracy and convenience.

**OFFERINGS:**

*Idemia MorphoWave™ Compact Touchless*

*Biometric Reader*

## Fewer touch points

Employees feel more comfortable the fewer surfaces they must touch, leaving them free to focus on their work and be more productive. Our touchless solutions include mobile credentialing and biometric devices which offer significant ways to reduce the number of touch points required to enter your buildings and access different rooms and floors.

## Safe occupancy levels

Maintaining safe occupancy levels is essential, and our software makes it easy to monitor and control the number of people in every area of your building, helping both occupants and visitors feel safe and secure. Additionally, incident management and event notification tools help ensure you're prepared if an incident should occur.

## Our innovative occupancy management tools can be tailored across a wide variety of verticals and requirements to fit your specific facility and workforce needs.

### Occupancy Management

Our innovative software offerings provide data, reports, notifications, alerts and visual dashboards based on your facility's occupancy thresholds and even allow you to restrict access to areas that are at maximum capacity.

#### OFFERINGS:

*OnGuard/NetBox Occupancy Max Volume Alert*  
*OnGuard/NetBox Occupancy Excess Prevention*  
*OnGuard Occupancy Board*  
*OnGuard/NetBox Occupancy Count Report*

### Lockdown/Mustering

These tools allow you to quickly communicate and execute a mass evacuation as well as keep tabs on users within a designated area outside the building.

#### OFFERINGS:

*OnGuard and NetBox Access Control Systems*

### Employee/Visitor Communications

Digital solutions make it easy to deploy mass communications in the event of an emergency and create evidence files for video forensics.

#### OFFERINGS:

*Magic Monitor® Digital Signage*

### Contact Notification Service

Users can assess their health symptoms and receive real-time social distancing reminders and anonymized notifications if they have recently come into contact with a user who self-assessed as being positive for COVID-19.

#### OFFERINGS:

*BlueDiamond™ Contact Notification Service*

### Intercom/Emergency Communications

This intelligent platform enables you to integrate voice communications into your security system and quickly respond to critical events.

#### OFFERINGS:

*Zenitel Intelligent Communications*

### Event Management

Our advanced solutions allow you to temporarily block cardholders or visitors from specific locations and track all access events related to that person. Support contact tracing efforts by tracking access events for users and then create reports to identify others who used the same readers within a specified timeframe.

#### OFFERINGS:

*OnGuard Blocked Person*  
*NetBox Trace Person*  
*OnGuard/NetBox Proximity Report*

## A healthier future starts indoors.

Carrier's Healthy Buildings Program provides an expanded suite of advanced solutions to help deliver healthier, safer, more efficient and productive indoor air quality regardless of your building type/indoor environment. From innovative products, controls and system design solutions to remote services including assessments, maintenance and re-commissioning, you can trust Carrier's 100+ years of experience creating optimal indoor air environments to help you with yours.

And since the most important part of any building is the people inside it, LenelS2 has developed a full suite of innovative solutions designed to make your facilities safer and healthy – and to ensure your employees have the confidence they need to feel secure and be productive.
