Intelligent Key and Asset Management

Securing an educational facility and its valuable assets is not an easy task. With multiple buildings and hundreds of expensive devices spread across campus, it can quickly consume valuable administrative resources.

Traka provides an efficient and effective solution for **securing and managing your facility keys, laptops, tablets and other sensitive equipment**. By decentralizing, your keys and assets are safely stored where they are needed most, automatically distributed to authorized users, and centrally managed from our intuitive software.

Traka's secure key cabinets and locker systems can be managed from any authorized computer or device on your network. The time of every user and asset action is recorded, providing full user accountability and valuable reports on usage.

Our solutions can integrate into your existing student database or access control platform, making administration easy, and enabling realtime workflows that improve your operational processes. **Traka gives you complete control over your master keys, vendor badges, pooled assets and fleet keys like never before.**

What to expect with an integrated key and asset management system from Traka:

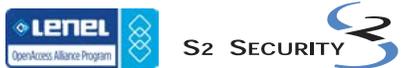

- **Reduced administration** – no need to manually distribute keys or log usage
- **Monitor user activity** – each user is uniquely identified through PIN, access badge or biometrics
- **Better control** – allocate specific items to authorized users for specific time periods, such as during class hours or for an entire semester
- **Reliable and robust** – our nickel-plated brass iFobs provide years of proven maintenance-free use
- **Increased visibility** – realtime and centralized activity reporting, with email notifications and alarms to instantly alert administrators of important events
- **Deep integration functions** – can integrate with third-party databases and systems to lower administration and drive process

traka.com

Traka systems can be seamlessly integrated with your existing databases for the ultimate asset management solution.

## Intelligent Asset Management For Education Environments

Precise control and management of valuable assets is of paramount importance within any modern educational environment. Traka's proven and reliable solutions enable you to better manage access to your keys, laptops, tablets, specialized equipment and vehicle fleet – and by integrating with your existing HR database or access control system, we can drive your processes like never before, making your operation more effective and efficient.

### Key Management

- Limit access to facility keys and sensitive areas for better control
- Define unique access restrictions to specific key sets
- Require multi-level authorization in order to release critical keys
- Report key usage, identify when keys are taken and returned, and by whom
- Automatically alert when specific keys are removed or not returned on time, via email or SMS
- Manage and record the use of fleet vehicles
- Report on mileage, fuel, hours used, and even where the vehicle is parked
- Automatically prevent access to vehicles with reported issues or that are scheduled for maintenance
- Always know who has accessed keys, and when

### Asset Management

- Manage and control the use of laptops, tablets, radios, weapons, tools and specialized equipment
- Items are secured in our intelligent lockers and automatically distributed to authorized users only
- You choose who has access to what items, and when
- Create a controlled environment, so users are 100% accountable for the items they use
- Integrated power charging and data connections are available to ensure that devices are always ready for use
- RFID tagging can be used to uniquely identify every device
- Our administration software gives you full visibility of every controlled asset
- Collect valuable data on item usage to reduce inventory

### Built to Last

Our robust nickel-plated brass tube iFobs give you the confidence that your system will work reliably and effectively every time! No cleaning necessary, no concerns over the reliability and durability of plastic tags, and the innovative ability to read and write data to each iFob – giving universities a variety of solution options.

**Simple, logical and effective – Traka solutions simplify your administration and make your assets work for you like never before.**
