4 Benefits Janitorial Manager Brings to In-House Service Providers →

JANITORIAL MANAGER

Achieve Budget Goals

- Create detailed work loading documents with industry standard tasks and times. View reports on the financial impact of service expectations and your staffing. Discover how changes in products or procedures will impact your overall budget.
- Schedule, track, and document employee's time to assure a balanced workload and capture necessary data to manage more effectively.

Ensure Expectations

- Develop custom inspections to make sure your team is achieving facility standards.
- Utilize the mobile app to execute scheduled inspections with pictures, feedback, and quality measures then provide your team with necessary feedback, and if needed, the documented areas to improve.
- Email results to all necessary parties to provide communication and historical tracking of your team's performance.
- Implement photo enabled work-orders w/checklists to provide greater oversight and management for project completion.
- Utilize the inspection app to execute scheduled inspections from the job site using your phone or tablet.
- Include pictures, text, and email results to all necessary parties.

Strengthen Communications

- Utilize QR Codes with checklists and public scanning features to increase public trust and validate your essential services.
- View and share reports on tasks completed and labor invested in keeping a facility clean safe and healthy.
- Instantly message your employees with photo-enabled messaging to address and communicate challenges before they become problems.
- Overcome language barriers with multilingual and translation features.

Manage Assets

- Analyze and budget inventory usage to reduce expenses.
- Track inventory quantities and flow to the closet level to understand usage patterns.
- Allow employees to submit location-specific supply requests from the job site based on predetermined min/max levels.
