

Emergency Response & Environmental Services

Leading the industry with trained HAZMAT First Responders armed with the state-of-the-art equipment and technology.

SCAN ME

For over 20 years, PPM Site Services has been at the forefront of the environmental industry, delivering a wide range of emergency response services. Our crews respond to oil spills, hazardous material releases, hurricanes, floods, biological terror attacks (anthrax), avian flu outbreaks, and the coronavirus pandemic. Our industry leading personnel and equipment are relied on for comprehensive emergency clean up and decontamination of spaces and fleets in the most sensitive areas.

Environmental and Disaster Response

PPM Site Services has been leading the industry since 2002 with OSHA-trained HAZMAT First Responders armed with the latest resources and technology. We are uniquely suited with equipment and trained specialists to handle all situations and conditions, including:

- Natural Disaster Recovery & Restoration
- Confined Space Entry (CSE) Specialists
- AMTRAK & Advanced Rail Car Specialists
- Industrial Vacuum Services (Air-Movers)
- Quick Response
- PCB Spill Response
- Tank Cleaning
- Hydro-Blasting

Spills Clean Up

PPM Site Services offers a rapid and effective response to a wide range of land and marine spills. Our clients include petroleum companies, manufacturers and processors, utilities, aviation-related companies, railroad companies, regulatory agencies, and Fortune 500 companies. Solutions include:

- Emergency Spill Response
- Oil Spill Response and Removal
- PCB Spill Response
- Tanker / Truck Spill Response

Facility Services

- Assessment and remediation for mold, asbestos and contaminants
- Biohazard strike teams deep clean and disinfect entire facilities
- Site decontamination, dehumidification and drying
- Commercial and residential restoration
- Storm and flood damage restoration
- Fire clean-up and restoration

Decontamination & Remediation

Every day, PPM Site Services' OSHA-trained HAZMAT first responders are disinfecting, deep cleaning and restoring office buildings, subways, warehouses, passenger trains, retail shops, banks, schools, hotels and homes. From an MTA station to a 30-floor multi-use building, PPM has the capability to decontaminate personnel, equipment and facilities where hazardous materials, non-hazardous materials, and infectious substances have been released.
