Gale's Building Enclosure Design and Consulting Group (BEDC) was established over 45 years ago as a roofing design practice. It was a natural transition to expand our services to include the entire building exterior (walls, sealants, fenestrations, air barriers, curtain walls, plaza decks and below-grade waterproofing). These components, systems, and assemblies must be designed and installed to provide a water-tight, energy-efficient, and comfortable interior.

Gale provides enclosure design and consultation services on historic and new construction, rehabilitation of existing buildings, and forensic evaluations of enclosures that are not performing. Our mission is to understand our clients' needs and develop cost-effective, practical, reliable, and sustainable solutions.

SERVICES

- *Building enclosure commissioning (BECx)*
- *Construction phase services and monitoring*
- *Exterior wall restoration evaluation and design*
- *Façade and fire escape ordinance inspections*
- *Fenestration and curtain wall evaluation and design*
- *Forensic evaluations of problematic building enclosures*
- *Historic preservation*
- *Plaza deck and vegetated roof landscaping evaluation and design*
- *Roof evaluation and design services*
- *Structural engineering services relating to building enclosures*
- *Subgrade waterproofing analysis and design*
