

ABOUT US

MBP is a multi-disciplined consulting firm that provides a broad range of professional services designed to mitigate risk and optimize value within the built environment. Our diverse team of experts specialize in innovative solutions to our clients' dynamic infrastructure and facility needs. We maximize an owner's investment by identifying performance enhancements and efficiency improvements which translate into reduced lifecycle asset costs.

The firm has emerged as a national player in the architecture, engineering, and construction industry. Established in 1989, MBP is recognized by *Engineering News-Record* as a Top 100 construction management firm and Top 50 program management firm. We stand apart from our competitors in our diverse range of services, our attention to client service, our values-based leadership and culture, and our people. Our team includes some of the most experienced and qualified professionals you will find in the industry.

We serve both public and private owners, acting as an advocate and extension of staff providing value and protecting client interests every step of the way. We implement best practices and embrace lessons learned to provide sustainable, cost-effective solutions tailored specifically to the needs of the project.

Communication is paramount. MBP leverages technology to provide the information analytics project teams need in today's dynamic construction environment. We utilize leading web-based project management tools which provide stakeholders with easily accessible information available real-time.

The firm regularly exceeds client expectations and is dedicated to providing quality service, innovative solutions, and the corporate depth and diversity to deliver projects safely while meeting or exceeding budget and schedule commitments. Whether a large program or small project, our diverse team of professionals at MBP can provide creative solutions to complex situations.

- Building commissioning/monitoring
- Lean project delivery
- Economic/budget analyses
- Earned value management
- BIM planning/implementation

MBP is a leader in mitigating construction risk, offering a broad range of construction management and consulting services to optimize value within the built environment.

MBP assumed the leadership role for this project (Todds Lane/Big Bethel Road Intersection Improvements) and eased communication between all parties. The use of their Share Point site provided RFI's and submittals to be reviewed in a timely manner to eliminate possible conflicts. All requests were documented, organized, and followed through to the end. This was a tremendous asset during our federal audits, all of which we passed.

The risk management program employed by MBP was instrumental by avoiding a redesign, saving \$120,000 and a 1-2-month delay. These outstanding efforts by MBP resulted in a project that was completed 10 days early and \$370,000 under budget. The City of Hampton was especially pleased with MBP's conscious efforts overall, completing only .5% over contract value including the eight change orders."

Michael S. Hodges, PE
City of Hampton Engineering Manager
